

## LIVE HEALTHY SOUTH CAROLINA

Live Healthy South Carolina is an ongoing collaborative process with the Alliance for a Healthier South Carolina and SCDHEC. Its mission is **to improve the health of people and places across South Carolina.**

**Live Healthy South Carolina Data Walks help public health professionals and community leaders gain broad perspectives from their community members and generate engaging conversations about local health issues. Data Walks build on data from the State Health Assessment and provides guidance for establishing local community health improvement priorities.**

### The Live Healthy Data Walks:

- Communicate the facts (data) around selected health topics and disparities
- Promote discussion and problem-solving
- Raise awareness of the issues to our specific audience
- Help set priorities for action
- Promote problem solving and local solutions for health
- Potentially influence policy development
- Make a case for evidence-based initiatives that improve poor health outcomes and health inequities

The Alliance for a Healthier South Carolina through its partners developed of the 2018-2023 State Health Improvement Plan (SHIP).

This **CALL TO ACTION** will serve as a **Blueprint** to improve health:

- **Resilient Children** through safe and supportive environments
- **Chronic Health Conditions** through healthy lifestyles and environments
- **Behavioral Health** through mental health and substance use disorders education, resources and services
- **Health Care Transformation** to improve access to care, workforce development, integrated health care and informed consumer decisions
- **Factors that Affect Health** work that addresses the social determinants of health and health disparities such as housing, education, income, etc.
