

Providing support for those impacted by **VACCINE-PREVENTABLE DISEASES**

Have you or someone you know been impacted by a vaccine-preventable disease such as COVID-19, flu, meningitis, or whooping cough?

Losing a loved one to a vaccine-preventable disease, or surviving serious medical complications from such diseases, can be devastating. Many times, impacted individuals and families don't know where to find support.

Vaccinate Your Family (VYF) is a national nonprofit organization that has been protecting people of all ages from vaccine-preventable diseases for 30 years by:

Raising awareness of the critical need for timely immunizations

Increasing the public's understanding of the benefits of vaccines

Increasing confidence in the safety of vaccines

Ensuring that all families have access to lifesaving vaccines

Advocating for policies that support timely vaccination

OUR ADVOCACY PROGRAM

VYF's advocacy program supports individuals and families who have been impacted by a vaccine-preventable disease through loss or survivorship. Our advocacy program is centered on creating a community where individuals and families can share their personal stories and get involved in various advocacy efforts to honor their loved ones and educate others about the seriousness of these diseases and the importance of timely immunizations.

Personal Stories
