

NEW COVID VARIANTS SPARK CONCERN

The new variants, BQ.1 and BQ 1.1, under the parent lineage BA.5, are more aggressive than previous variants and now make up more than 11% of cases in the US

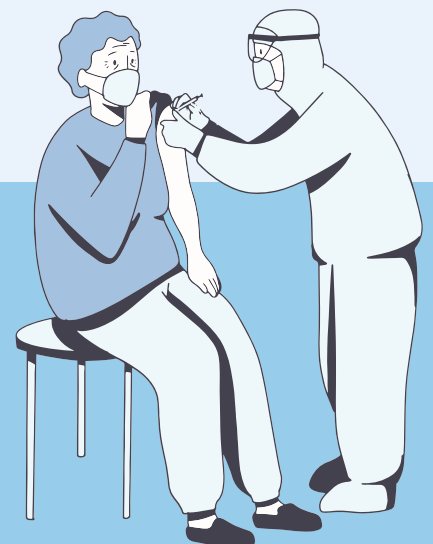

WHAT DOES THIS MEAN?

BQ 1.1 may become the dominant variant in the next wave over the coming weeks

COVID CONTINUES

Vaccines provide protection against severe symptoms, but you might still get infected. Protect yourselves at all times

GET BOOSTED

Vaccine boosters, like the new bivalent Omicron, will provide increased protection against hospitalization and death

NEW COVID VARIANTS SPARK CONCERN

The new variants, **BQ.1** and **BQ 1.1**, under the parent lineage BA.5, are more aggressive than previous variants and now make up more than 11% of cases in the US

WHAT DOES THIS MEAN?

BQ 1.1 may become the dominant variant in the next wave over the coming weeks

COVID CONTINUES
