

# RSV HITS HARDER AS YOU GET OLDER.

ONE SHOT CAN PROTECT YOU.

You're at higher risk if you<sup>1</sup>:

- Are age 75+
- Have heart or lung disease
- Have a weakened immune system
- Live in a care facility

RSV spreads fast—through coughs, sneezes, and close contact.

It can lead to pneumonia, hospital stays, or death.

THE  
GOOD  
NEWS?

There's a vaccine. One dose.  
Long-term protection.<sup>1</sup>

## DON'T LET RSV TAKE YOU DOWN.

Talk to your doctor  
about the RSV vaccine.
